

Make your own daffodil

Materials

Print out stem and leaf templates on strong green card.

Print out petals on strong yellow card.

Print out flower trumpet on orange paper.

You will also need a large thin paperclip.

Instructions

- Cut out rectangular stem and twist into a narrow cone shape of roughly 1 cm thick at the top and no more than 3cm thick at the base. Secure it with clear tape along edge.
- Cut out leaf templates and snip along the dotted lines making sure not to cut too much.
- Push slots A and B together to form a cross shape '+', make sure both edges are flat to table surface.
- Carefully mark on the base of the stem the points where the leaves will slot and make four cuts of approximately 4cm deep.
- Slot the leaves into the stem and adjust to stand straight, then secure with clear tape.
- Cut out each petal shape and, placing one on top of the other, carefully pierce a hole in the middle of them. The best way to do this is to use some blutack underneath and a thin pencil or pen.
- Twist one set of petals so that you can see all six petals.
- Cut out the trumpet on yellow paper, and bend into a cone shape. Making line A and B meet to form a straight edge, and fix with some clear tape.
- Crease the tab of the trumpet along the centre and thread through the holes in the petals, securing at the back with clear tape.
- Make one bend in the paperclip to form an 'L' shape and thread one half through the paper trumpet and petals and the other half down into the stem. Secure the trumpet with tape if required.
